Company Profile

About Us
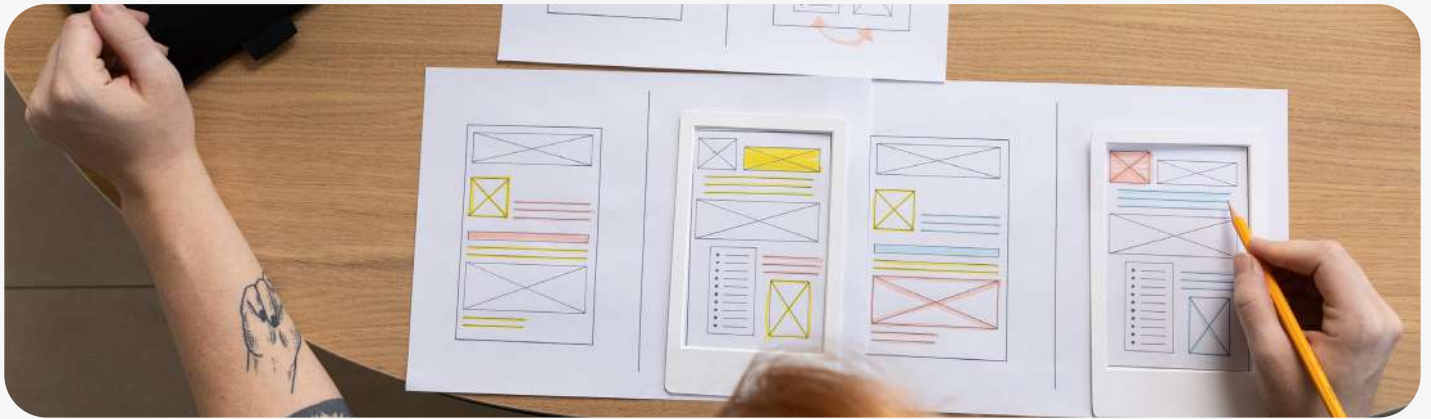

Devoq Design is an Ahmedabad-based UI/UX design agency with a wealth of creative minds.Our team consists of creative UI/UX designers who have a knack for UI and UX design.With an intuitive and inspiring UI design, we offer the best user experience (UX), which is the first requirement to capture leads and increase conversions.Each of our designs is unique around the world.

Customer satisfaction is our top priority, so we strive to achieve excellence. We believe in maintaining a long-term relationship with our clients. In order to provide the best solution, we work closely with our clients to understand their needs. Our quick great arrangements trigger consistent business changes and steady business growth by working closely with our customers from usage to date.

Creating the Perfect Harmony for Your Digital Solutions.

Why Choose us?

Design is our passion. We work to complete your needs and deliver the best design. Our designer thrive into your product and make a deep research so we can create the unique design for your business. Quality and Talent of ours will help your business growth.

Talented Designer.

Acquire, engage, and retain the right talent across verticals and functions when, where, and how you need it; whether it is contract, statement of work, or technology partners.

Transparency

The most fundamental value of any business is integrity and transparency. From our business processes to communication, from project scope definition to the final design - everything is transparent and integrity driven.

Commitment of quality

We ensure every delivery is up to the mark and meets the expectations. As the leading UI/UX design company, we are obsessed with quality, not just practice, but how we work every day.

Our Services

We at devoq design are always ready to serve you with the best in class and top notch designs for your every need. We make sure that the designs are made keeping in mind the client requirements. We deliver the best in terms of quality that encourages us to standout from others and push our daily limits.

Process we follow

Our design process follows a proven approach. We begin with a deep understanding of your needs and create a planning template.

Project scope and Research

A well-designed product hinges on comprehensive research and a clear understanding of the scope.

Wireframe

Wireframe used to plan the layout of a user interface, and is commonly used in web design and software development.

UI UX Design

With a clear understanding of users, market, and competitive landscape, designers can start the UIUX phase.

Prototype

Prototyping is crucial for testing and validating ideas before investing too much time and energy.

Development

Create a powerful API and accelerate development with an agile process to ensure success.

Quality Assurance

Releasing top-notch builds is the responsibility of our QA team, who are tasked with testing every build submitted.

Deployment

Unleash a seamless user experience by providing effortless access to your website or Mobile app!

Support & Maintenance

Our team of highly qualified technicians is at your service 24/7, providing comprehensive support and maintenance.

Learn App

Learn - Learning App

Platform: Android | Duration: 2 Months

Client Goal

The client comes up to us with only logo in RED and client want to keep clean light and all in black and white color, we schedule discussion and give a suggestion with their branding color. He goes with our idea and we created a clean and easy to understand app for the customer
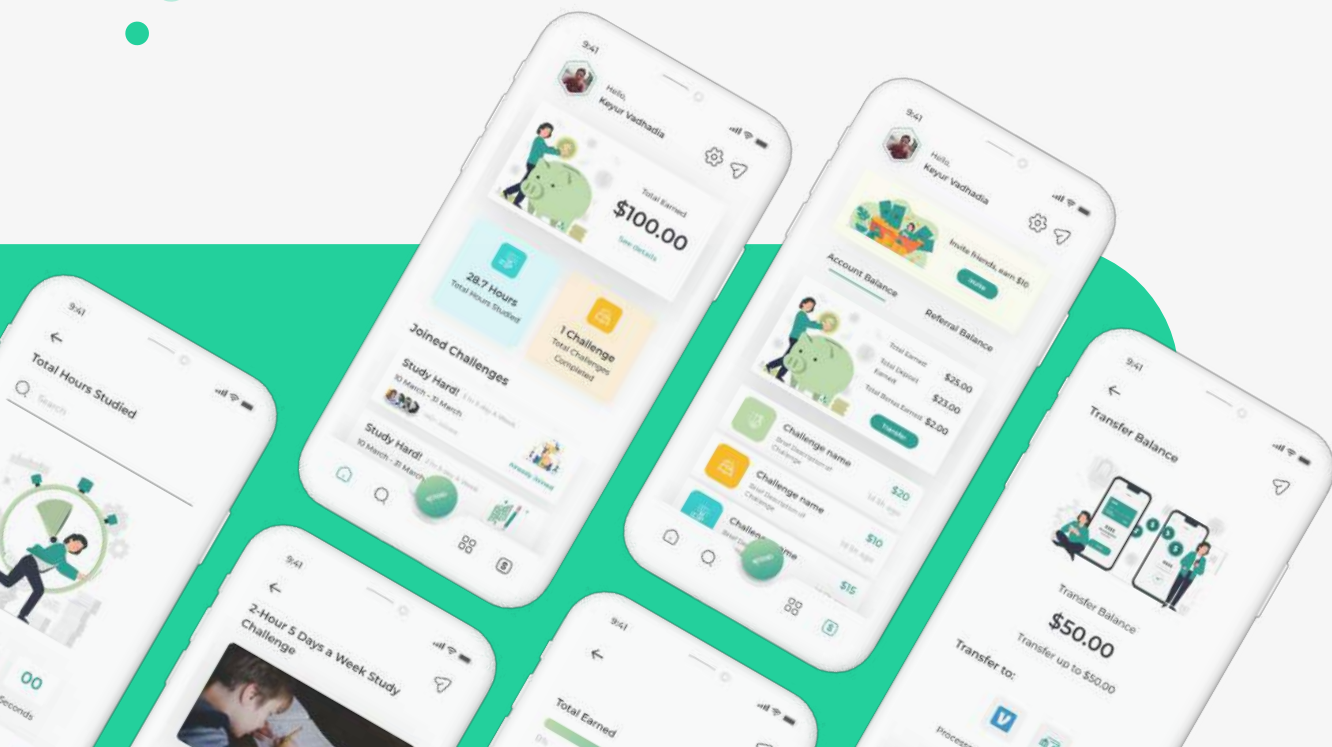

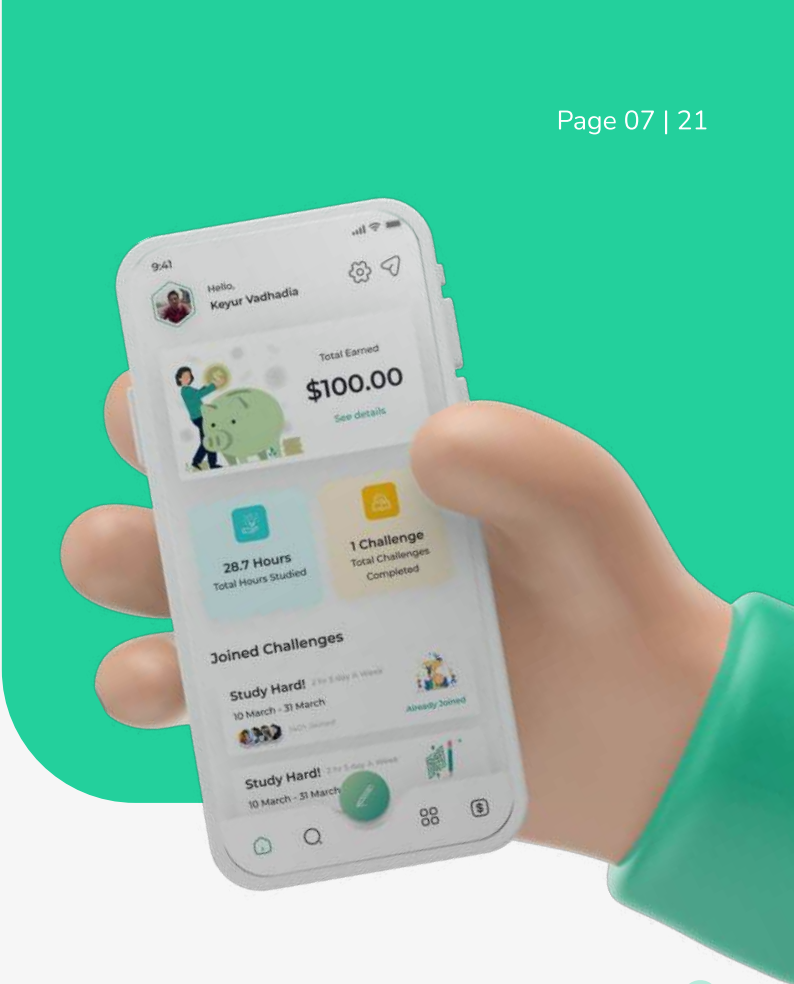

Client Feedback
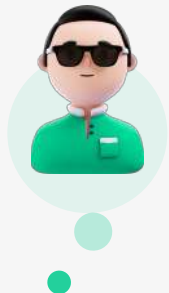

Roger George

Client Goal

The goal of the MinxPay financial payment web dashboard page is to provide users with a user-friendly and secure platform to manage their financial transactions, including sending and receiving payments, checking account balances, viewing transaction histories, and monitoring account activity.
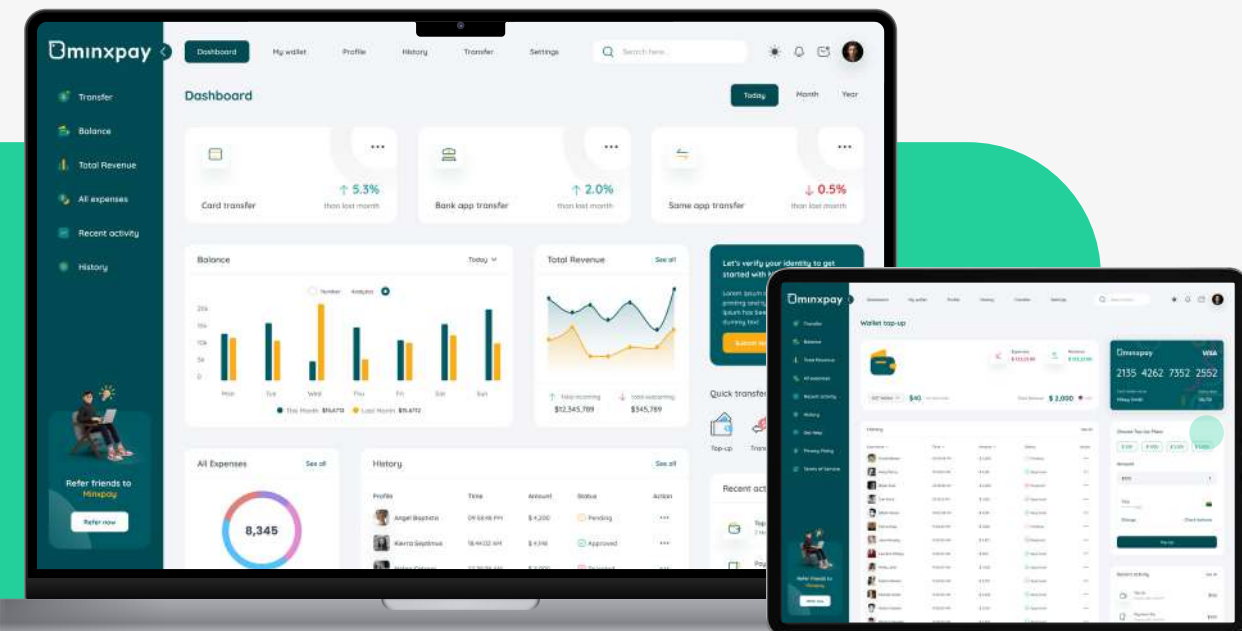

Client Feedback
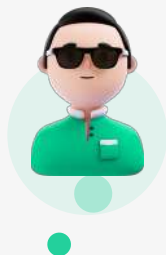

Henry Willams

★★★★★

Great value! Good at taking UX input, being collaborative, and turning around high quality screen comps, screen/process flow and logos work very quickly.
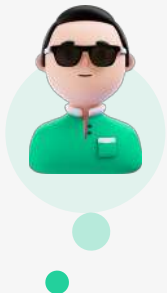

EDU

EDU - Online Study Web

Technology: React native | Duration: 3.5 Months

Client Goal

The goal of the online study website design is to provide students with a comprehensive and user-friendly platform for accessing educational content, participating in online courses, and interacting with instructors and peers.

Client Feedback

Christopher Logan

★ ★ ★ ★ ★

They researched screens by themselves with very less inputs from us, I'd like to work with them next time if we have any UI/UX requirement."
